# PUT OUR TEAM TO WORK FOR YOU

CONNECTING YOUR FACILITY TO THE RESOURCES YOU NEED.

## Flexible Solutions for Your Sports Fields Needs

No matter the situation, KEI Sports Fields is here to help. Whether it's on-site consulting, successful maintenance practices, design knowledge or renovating an existing field, the experts at KEI will meet with you to discuss your issues, suggest solutions, and implement practices to assist you in creating a field that all others will be compared to.

KEI Sports Fields brings over 75 years of combined experience to the table. Our staff is homegrown and represents the values of hardworking individuals. Let us help you make your fields better and see the results that come with improved fields both physically and aesthetically.

## Seasonal Maintenance Programs for Total End-to-End Solutions

### Construction Solutions

Constructing Sports Fields is a science all of its own. Let our tremendous staff build your field to withstand the ever-changing weather conditions experienced during the wet springs, the hot dry summers and the unpredictable falls. We have the equipment, knowledge and team that can effectively and efficiently construct everything from a single baseball field, to a varsity football stadium or a multi-field softball facility.

### Custom Design

Let the professionals at KEI Sports Fields take your dreams and turn them into reality. Whether your game is baseball, softball, football, soccer or lacrosse we have the experience to design and implement your wishes. Taking an empty piece of land and transforming it into a functional sports field, brings tremendous gratification to our staff.

### Renovation Services

Wear spots in your soccer goal mouths? Is your pitcher's mound or batter's box full of craters that likes to dig in? Does your football field have thin turf between the hash marks? Is the back arc on your baseball field a hazard because of the excessive lip that has developed over time? These are all items that can be rectified through simple renovations. Let our experts give you a free quote today.

In today's world of dwindling staff and shrinking budgets, it is becoming alarmingly difficult to achieve the level of adequate maintenance on demanding sports fields. Let KEI handle the items that often get left behind due to labor and budget issues. Custom Maintenance by KEI can be tailored to any or all of your not so day-to-day maintenance tasks. Give us a call to schedule a meeting that can outline how we can help you maintain high quality sports fields without the stress of doing the work yourself.
